

XM Satellite radio has changed the way in which I listen to music forever. I now consider listen to radio over top of everything else, when before I would never even think about turning the radio on and only listened to CD's. If the radio people feel that they are losing business and money from the addition of XM, then maybe it's time for radio to step-up and get better programming, better listening options, and way to make radio reception better. I urge the FCC to reject the NAB's petition 04-160 and if radio gets XM Satellite radio off the airwaves, I surely will not turn my dial to FM or AM and instead resort back to CD's and other forms of music.
